THE LOOKING GLASS BEAUTY SCHOOL

B04 Practical Observation Assessment and Marking Sheet

Direct observation of a full builder gel service on a suitable adult model. Twenty criteria; seven safety-critical (marked SC) must all be met. Pass: at least 80% overall (32 of 40 marks) AND every SC criterion met.

Builder Gel Overlay and Short Extension CPD Course | Course author: Jessica Jane Preston | Version 1.1, October 2026 | Continuing Professional Development activity, not a regulated qualification.

Learner name: _____ Model name/code: _____ Date: _____ Time: _____

Subject: builder gel overlay, short extension on a tip or form, and removal or infill. Product system and lamp used: _____

Scoring each criterion: 2 = met to a professional standard without prompting; 1 = met with one prompt or a minor fault corrected; 0 = not met. A safety-critical criterion scored 0 is a fail for the assessment regardless of total.

Health and safety and hygiene

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
Work area set up clean, lamp and extraction checked, products closed, PPE as per COSHH assessment		
SC Hands sanitised; single-use items used once; tools from a clean, decontaminated set		
SC Blood or skin-break procedure known and followed if needed		

Consultation and planning

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
SC Consultation completed on Form A; contraindications checked on every nail and both hands		
SC Treatment plan agreed and explained, including heat-spike warning and stop signal		
Consent obtained; separate photo consent handled correctly		

Preparation

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
SC Free edge shaped with the finger supported; proximal fold pushed back without cutting living tissue		
SC Only loose, non-living cuticle removed; no filing into the lateral folds		
Plate de-shined with 240 grit or finer, not thinned; dust removed, cleansed, dehydrated; bonder/primer to plate only		

Application

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
Slip or scrub layer thin and fully cured for the product's stated time		
SC Bead placed behind the stress area; product guided with a hairline gap at every fold; no product on skin		
SC Finger turned to self-level; flash cure at the right moment; full cure every layer with the compatible lamp		

Apex in the back third, blended smoothly; even C-curve from the barrel; straight sidewalls from above		
Thickness: hairline at cuticle, credit-card at free edge; free edge capped		

Short extension (tip or form)

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
Tip fitted sidewall to sidewall, blended and shaped before gel; or form fitted with no gap and sidewalls not pinched		
Extension kept within the product's stated capability; apex behind the stress area, not on the extension		

Finishing, aftercare and records

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
Inhibition layer removed with fresh lint-free wipe and specified cleanser; refined and top-coated to a smooth finish		
SC Removal or infill demonstrated by the method the product requires; no prising, nipping or filing into the plate		
Aftercare given verbally and in writing; review and infill date agreed		
Treatment record (Form C) completed: products, lamp, cure times, observations, variations, aftercare		

Result

Total score /40	Percentage	All SC criteria met Y / N	Pass Y / N	Re-assessment agreed Y / N (date)
