THE LOOKING GLASS BEAUTY SCHOOL

# L02  Theory Assessment Paper

Written assessment, 38 questions, 50 marks. Pass mark 40 (80%). Closed book. Time allowed: 60 minutes.

Lash and Brow Tint and Wax CPD Course  |  Course author: Jessica Jane Preston  |  Version 1.0, November 2026

Learner name: _____  Date: _____  Tutor: _____

Instructions: Section 1 has 28 multiple-choice questions worth 1 mark each (circle one answer). Section 2 has 8 short-answer questions worth 2 marks each. Section 3 has 2 scenario questions worth 3 marks each. Answer every question. Any answer that instructs tinting without a recorded negative patch test, tinting a client under 16, tinting with the eyes open, leaving tint in an eye without irrigating, waxing the eyelid, reusing a spatula, waxing over a contraindicated area or treating a red, sticky or swollen eye must be corrected with the tutor before a pass is awarded, whatever the score. Reasonable adjustments (extra time, questions read aloud, oral answers recorded by the tutor, large print) are available on request and do not change the pass mark.

## Section 1: multiple choice (28 marks)

**1. An eyelash or eyebrow tint colours the hair by:**

a) Coating the outside of the hair like mascara
b) Forming large colour molecules inside the cortex from small precursors and a developer
c) Bleaching the hair and staining it
d) Dyeing the skin at the root

**2. The developer used with a professional lash and brow tint is usually:**

a) Hydrogen peroxide of about 3% (10 volume), the tint's own
b) A 9% hairdressing developer for a stronger result
c) Water
d) Any peroxide, as long as the ratio is right

**3. The school's standard for a patch test before a first tint is:**

a) Immediately before the treatment
b) At least 48 hours before, with the exact tint and developer, recorded
c) Once a year
d) Only for clients who ask

**4. A patch test is repeated:**

a) Never, once it has been negative
b) For every new product family, after a six-month gap, and after any change in health, medication or pregnancy
c) Only if the client reacted last time
d) Every visit

**5. A client tells you she had a blistered reaction to a black henna tattoo on holiday. You:**

a) Do a patch test to check
b) Never tint her and never patch test her: she is sensitised to PPD; offer shaping only
c) Use a 'hypoallergenic' tint
d) Tint the brows but not the lashes

**6. The minimum age for an eyelash or eyebrow tint is:**

a) 12 with a parent present
b) 14
c) 16, because the products carry the warning 'not intended for use on persons under the age of 16'
d) There is no minimum

**7. The lid skin is:**

a) The thickest skin on the face
b) The thinnest skin on the body, about half a millimetre, and is never waxed
c) Waxed only with strip wax
d) The same as the brow skin

**8. During a lash tint the client's eyes are:**

a) Open and looking up for the lower lashes
b) Closed and relaxed from the first pad to the last wipe
c) Closed tightly
d) Open for the upper lashes

**9. Under-eye pads are placed:**

a) On top of the lower lashes
b) Under the lower lashes, on the skin, with the eye closed, not touching the eye
c) Only if the client has sensitive skin
d) After the tint is applied

**10. Brow tint is checked:**

a) After ten minutes
b) At one minute, by wiping a small section, and built in stages
c) Only at the end
d) Never; the timer decides

**11. Brows are tinted:**

a) After waxing, so the shape is clear
b) Before waxing, because tint on freshly waxed skin stings, stains and risks sensitising
c) At the same moment as waxing
d) Only on a separate visit

**12. Tint goes into a client's eye. You:**

a) Finish the development then rinse
b) Stop, remove the pad and all tint, tilt the head to that side and irrigate with sterile saline from the inner corner outward for at least 10 minutes
c) Give the client a tissue and carry on
d) Rinse with tap water for a few seconds

**13. The three mapped points of the brow are found with a straight edge from:**

a) The centre of the chin
b) The side of the nostril: straight up past the inner corner, through the outer edge of the iris, and past the outer corner of the eye

c) The ear
d) The pupil

**14. Wax is applied:**

a) Against the hair growth and removed with the growth
b) With the hair growth and removed against it, parallel to the skin, with the skin held taut
c) In any direction, as long as it is thin
d) Upward on every area

**15. The wax temperature is tested:**

a) On the client's brow
b) On the professional's own inner wrist and then on a small area of the client's skin, before the first application
c) By looking at the thermostat
d) By touching the pot

**16. A spatula that has touched a client's skin:**

a) Goes back into the pot if the skin looked clean
b) Is binned; a fresh spatula is used for every dip
c) Is wiped and reused for that client
d) Is disinfected and reused

**17. A client using a prescription retinoid cream on the brow area:**

a) Can be waxed as normal
b) Is not waxed there until the cream has been stopped for at least seven days; tweezing is the alternative
c) Needs hot wax instead of strip wax
d) Needs a lower temperature

**18. Isotretinoin (oral acne treatment) stops waxing:**

a) For one week
b) During the course and for six months after
c) Only on the day of the dose
d) It does not

**19. After botulinum toxin injections to the brow or forehead you wait before waxing:**

a) 24 hours
b) Fourteen days
c) No waiting is needed
d) Six months

**20. A client arrives with a red, sticky, watering eye. You:**

a) Tint the other eye only
b) Refuse both eyes, suggest a pharmacist or GP, decontaminate and record
c) Wax the brows and tint the lashes
d) Tint with the eyes open so you can see

**21. A stye is:**

a) A blocked tear duct
b) An infection of a lash follicle's gland: no treatment on that eye until resolved
c) A sign of allergy
d) Harmless and can be worked around

**22. The eyelash growth cycle means a lash tint lasts:**

a) Permanently
b) About four to six weeks, fading as the tinted lashes are shed
c) One week
d) Until the next wash

**23. Which claim is acceptable under ASA/CAP guidance?**

a) 'Permanent mascara'
b) 'Defined, waterproof colour that lasts until the lashes naturally shed, usually four to six weeks'
c) 'Makes lashes grow longer'
d) 'No patch test needed'

**24. Brow and lash tints are regulated as:**

a) Medicines
b) Cosmetic products under the retained Cosmetics Regulation 1223/2009, with Annex III conditions for professional use on the lashes
c) Unregulated salon supplies
d) Hair products with no eye-area rules

**25. The professional's own protection against tint sensitisation is:**

a) Not needed; only clients react
b) Nitrile gloves for every mix, application and removal; no tint on the skin; ventilation
c) Washing hands after the day
d) Using a brown shade

**26. Itchy, swollen, weeping eyelids 48 hours after a tint most likely indicate:**

a) A normal contra-action
b) Allergic contact dermatitis: no further tint, pharmacist or GP, record and report
c) Too much developer
d) A reaction to the pads

**27. On a first visit the brow tint shade should be:**

a) Black, to make the most difference
b) One step lighter than you think, built in stages; it can be darker next time
c) Whatever the client's hair dye box says
d) The darkest in the kit

**28. Which of these is within the scope of this course?**

a) Lash lift
b) Brow lamination
c) Eyebrow shaping by waxing, tweezing and trimming

d) Henna brows

## Section 2: short answer (16 marks, 2 each)

**29. Describe how you carry out a patch test, from preparation to recording.**

_____
_____
_____

**30. Name four things that decide how dark a tint result is.**

_____
_____
_____

**31. Why are the eyes kept closed and relaxed, rather than closed tightly, during a lash tint?**

_____
_____
_____

**32. List the contraindications that stop a brow wax but allow a brow tint.**

_____
_____
_____

**33. Explain why one spatula is used for each dip into the wax pot.**

_____
_____
_____

**34. Describe the removal of a lash tint, step by step, with the client's eyes still closed.**

_____
_____
_____

**35. What do you record after a brow wax and tint, and why?**

_____
_____
_____

**36. A client is 17 and wants a brow tint. What is needed before you proceed?**

_____
_____
_____

## Section 3: scenarios (6 marks, 3 each)

**37. Scenario A. A regular client arrives for her usual lash and brow tint and brow wax. Her last visit was seven months ago; she tells you she has had a baby since and is breastfeeding. Her eyes and skin look healthy. Set out what can be done today, what cannot and why, what you say, and what you record.**

_____
_____
_____
_____
_____
_____

**38. Scenario B. Two minutes into a lash tint the client raises her hand and says her left eye is stinging. Describe exactly what you do next, in order, what you say, what you do with the right eye, and what goes in the record.**

_____
_____
_____
_____
_____
_____

## For tutor use
