THE LOOKING GLASS BEAUTY SCHOOL

L04 Practical Observation Assessment and Marking Sheet

Direct observation of a full service on a suitable adult model: consultation and patch-test check, preparation and eye protection, eyelash tint, eyebrow tint, eyebrow shaping by wax, tweezers and scissors, aftercare and records. Twenty criteria; seven safety-critical (SC). Adapted from The CPD Group practical observation template.

Lash and Brow Tint and Wax CPD Course | Course author: Jessica Jane Preston | Version 1.0, November 2026

Learner name: _____ Model name/code: _____ Date: _____
Assessor: _____

Subject: the model is aged 18 or over, has a negative patch test with the school's tint and developer recorded at least 48 hours before, and has no contraindication. The learner tints the lashes and brows and shapes the brows in one appointment, in the order tint, tidy, shape. A model without a recorded negative patch test is shaped only, and the tint criteria are assessed on a later date (record which). Tint shades and developer: _____ Wax: _____

Scoring each criterion: 2 = met to a professional standard without prompting; 1 = met with one prompt or a minor omission corrected on the spot; 0 = not met. Pass: 32 out of 40 overall AND every criterion marked SC scored at least 1 with the fault corrected, or 2. An SC criterion scored 0 is a fail regardless of the total; the learner may be re-assessed on a later date after further practice.

Health and safety and hygiene

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
Work area set up clean and uncluttered; couch covered; heater on a lipped surface with the lid on; saline pods, timer and cool compress to hand; bin lined and positioned.		
SC Hands washed; nitrile gloves worn for tinting and waxing; single-use items (applicators, pads, wands, spatulas, strips) used once and discarded, a fresh spatula for every dip into the wax; tweezers and scissors clean before and decontaminated after; waste disposed of correctly; the blood-spot procedure followed if needed.		
Professional appearance and posture: couch raised, stool in, forearm rested, tools pointing away from the eye; the client's hair protected and jewellery removed.		

Consultation and planning

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
SC Consultation completed on Form A; patch test for the exact tint and developer confirmed negative and recorded on Form G at least 48 hours before, checked before anything is mixed; age 16 or over confirmed for any tint (parental consent and the insurer's rule for a client under 18).		
SC Contraindications checked on the eyes, lids, lashes, brow hair and skin in good light; a red, sticky, swollen, crusted or painful eye, or broken, sunburnt, retinoid-treated or otherwise contraindicated skin, not treated; nothing diagnosed; the decision explained kindly and recorded.		
Treatment plan agreed and explained (shade and development, wax type, time, price, aftercare, rebooking); consent recorded; contact lenses out; a stop signal agreed; brows mapped with the three lines from the side of the nostril, the points marked and the shape agreed in the mirror with the client sitting up and the face relaxed.		

Preparation and protection

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
Lashes and brows cleansed with an oil-free remover until the pad comes away clean; brows brushed; barrier cream applied to the lid above the lashes, under the pad and around the brow shape, not on the hair.		
SC Under-eye pads placed on the skin under the lower lashes with the eyes closed, not touching the eye, no lash trapped; the client's eyes closed and relaxed from the first pad to the last wipe; the client never left alone during development.		
Tint and developer mixed in the manufacturer's ratio, the correct shade or mix for the client, in a clean dish, with a fresh applicator; used within the stated time.		

Eyelash tinting

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
Lower lashes then upper coated from base to tip in both directions with the lid supported; every lash covered; checked from the side and from above the head.		
SC No tint on the lid skin, margin or in the eye; any tint on skin lifted at once with a damp bud; stinging or a raised hand acted on immediately: stop, remove, irrigate with sterile saline from the inner corner outward for at least 10 minutes, record, refer if symptoms persist.		
Timed with a timer for the manufacturer's development; removed with a dry pad then damp pads until clean, pads slid out and down, the inner corner wiped outward and dried, before the client opens the eyes; even result, both eyes matching.		

Eyebrow tinting

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
Shade chosen for the client's hair (one step lighter on a first visit); applied against and then with the growth, tail first, within the mapped shape; combed through; tint on skin outside the shape wiped at once.		
Checked at one minute and built in stages to the agreed depth, not beyond the manufacturer's maximum; removed cleanly; skin staining lifted away from the eye; depth agreed in the mirror before shaping.		

Eyebrow shaping

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
SC Wax temperature tested on the professional's own inner wrist and then on a small area of the client's skin before the first application; pre-wax preparation as the wax maker directs; the heater lidded on a lipped surface.		

SC Wax applied thinly with the growth below the mapped line and removed against it, fast and parallel to the skin, the skin held taut by the other hand for every removal and pressed after; one pass per area; no wax on the mobile eyelid, over a mole or skin tag, or on contraindicated skin.		
Sections worked in order (under, between, above for strays only), the two brows matched section by section; stray and fine hairs tweezed in the direction of growth with the skin taut, around and never on a mole; wax residue removed.		
Hairs brushed up and trimmed a little at a time following the natural top line, then brushed down and across and only the tips below the lower line trimmed; no blunt stubs; a balanced pair checked in the mirror with the client sitting up and the face relaxed.		

Close

Assessment criterion	Score 0 / 1 / 2	Assessor feedback and evidence seen
Aftercare given verbally and the written handout supplied: hands off and dry for 24 hours, oil-free products, no heat or sun, what a reaction looks like and what to do, how long the result lasts, rebooking interval; cool compress offered.		
Products (shades, developer, batches, times), wax, temperature test, areas, shape, contra-actions and aftercare recorded on Form C; the trolley cleared, single-use items binned, tools to the used container, the heater lid on.		

Result

Total score /40	All SC criteria met Y / N	Result: Pass / Re-assess	Re-assessment date if needed

Assessor feedback to the learner (strengths, and the one thing to work on first):

_____

_____

_____

_____

Learner signature: _____ Assessor signature: _____ Date: _____

Reasonable adjustments made to the assessment method (if any), with the competence and safety standards unchanged:
