THE LOOKING GLASS BEAUTY SCHOOL

L05 Lesson Plan

Based on The CPD Group lesson plan template. One taught day plus pre-course study and post-course case studies.

Lash and Brow Tint and Wax CPD Course | Course author: Jessica Jane Preston | Version 1.0, November 2026

Course details

Course title	Lash and Brow Tint and Wax CPD Course
Duration	15 hours of learner effort: 1.5 hours pre-course reading, 7.5 guided learning hours on the taught day (excluding breaks), about 6 hours for three post-course case studies.
Date	Delivered on demand; each cohort's date is recorded on the register. Models attend a patch-test appointment at the school at least 48 hours before the course.
Venue	The Looking Glass Beauty School, 4a Roushill, Shrewsbury, Shropshire.
Tutor / assessor	Jessica Jane Preston (VTCT Level 2 NVQ Diploma in Nail Services; Award in Education and Training; lash and brow services at The Looking Glass).
Learners	Maximum four learners per tutor. Learners practise the lash tint on each other in the morning (each learner is patch tested at booking) and each brings a suitable adult model, patch tested at least 48 hours before, for the afternoon practical and assessment (confirmed at booking).
Entry requirements	Aged 18 or over; Level 2 Beauty Therapy or equivalent including skin structure and function, facial and eye-area treatments, consultation and safe salon practice; no known allergy to hair dye, tint or PPD without medical discussion.
Resources	Learner manual L01 (printed and digital); one couch, stool, trolley, magnifying lamp and mirror per workstation; professional eyelash and eyebrow tints in seven shades with their developer, dishes, disposable applicators, under-eye pads, barrier cream, oil-free remover, cotton, buds, wands, timers; sterile saline pods and an eye bath at every couch; thermostatic wax heaters with hot (peelable) and strip wax, spatulas, strips, pre- and after-wax products, slanted tweezers, brow scissors, spoolies, white pencils, orange sticks; nitrile gloves, aprons, headbands; cool compresses; disinfectant, the used-tool containers and the school's autoclave; Forms A to H; L02 to L04.

Health and safety

Room risk assessment and COSHH assessments (tints, developers, waxes, cleansers, disinfectants) reviewed before the day; SDS available at each station. Every learner and model has a recorded negative patch test with the day's tint and developer at least 48 hours before, or is not tinted. Nitrile gloves for every tint and wax; sterile saline within reach before any tint is mixed; the tutor supervises every development; eyes closed and protected throughout. Wax heaters checked by the tutor before the day, on lipped trolleys with lids, temperature tested on the wrist before every client; a faulty heater is withdrawn. Models complete Form A; no treatment on a contraindicated eye or skin. A first aider is identified; fire exits and the assembly point are explained at registration; a blood-spot kit is at every station. Any tint in an eye, reaction or burn is managed as the manual directs and recorded on Form E.

Equal opportunity and reasonable adjustments

Learners declare support needs at booking or on the day. Available without changing the competence or safety standard: large-print and digital manual, coloured overlays, extra time for the theory paper, questions read aloud and oral answers recorded, one-to-one demonstration, breaks on request, a seated position and couch height adjusted to the learner, a magnifying lamp at every station, and left-handed tweezers and scissors. Content is delivered by demonstration, discussion, images and supervised practice as well as text.

Aim of the course

To enable qualified beauty professionals to tint eyelashes and eyebrows and to shape eyebrows by waxing, tweezing and trimming safely, hygienically and to a commercial standard, understanding the anatomy of the eye area, how tint works and why it sensitises, the patch-test system, the contraindications, the health and safety controls and the UK legal responsibilities that go with working next to a client's eye.

Learner objectives (the ten learning outcomes from the manual, Chapter 1)

Obj. no.	Learner objective
LO1	Explain what eyelash and eyebrow tinting and eyebrow shaping are, their benefits and limitations, who they suit and when another service or a referral is the honest answer.
LO2	Describe the structure and growth cycle of the hair, the skin of the eye area and the anatomy of the eye, eyelids and eyebrow, and recognise the conditions that mean a treatment is adapted, postponed or refused.
LO3	Conduct and record a professional consultation, carry out and record a patch test, obtain informed consent and agree an individual treatment plan.
LO4	Explain how an oxidative tint colours the hair, why it can sensitise, how shade, developer and timing decide the result, and why the products are restricted to professional use and to clients aged 16 and over.
LO5	Select, handle, store and dispose of tints, developers, waxes and equipment in accordance with risk assessment, COSHH, manufacturer instructions and current UK requirements.
LO6	Prepare the client and the treatment area, protect the eyes and skin, and work hygienically throughout.
LO7	Tint eyelashes to an even, natural-looking result with the eyes protected and closed, no tint on the skin and no tint in the eye.
LO8	Tint eyebrows to a shade that suits the client, timed and checked, with the skin kept clean.
LO9	Map, wax, tweeze and trim the eyebrows to a balanced shape agreed with the client, with the wax temperature tested, the skin supported and the eyelid never waxed.
LO10	Provide aftercare, recognise and manage contra-actions, adverse reactions and tint in the eye, and set honest expectations about results and how long they last.

Pre-course (1.5 hours, home study)

Read manual Chapters 1 to 10; complete the four pre-course prompts in Chapter 19 (the SDS and instruction leaflets for the tint, developer and wax the learner will use; what a patch test is for and why a black-henna reaction means no tint; a mapped brow photographed with the marks on; three questions to bring). Handed in

at registration and checked by oral questioning during the morning. Learners attend, or arrange, their own patch test with the school's tint and developer at least 48 hours before the course so they can be tinted by a partner.

Taught day (09:00 to 17:30; 7.5 guided learning hours excluding a 30-minute lunch and two 15-minute breaks)

Time	Obj. no.	Content	Trainer activity	Learner activity	Resources	Assessment
09:00	—	Register, welcome, housekeeping (fire exits, first aid, breaks), Form H, pre-course work handed in; learners' and models' patch-test records checked; how the day and the assessments run	Presentation, discussion, record checks	Listening, questions, handing in pre-course work	Manual Ch. 1, register, Form H, Form G	Oral questioning on pre-course reading
09:20	LO1, LO2	What the three treatments are and are not, benefits and limits, the related services; the skin, the hair and its cycle, the eye, the lids and the brow; the conditions that stop the treatment, from the illustrations	Taught session with images; questioning	Listening; identifying conditions from the illustrations; discussing own clients	Manual Ch. 2 to 4, Figures 1 to 6	Direct questioning; identify three conditions and the action for each
10:15	LO3, LO4	Consultation and the patch test; how tint works and why it sensitises; shade, developer and timing; the legal position of the products; consultation role play	Demonstration of a consultation and a patch test; tint and developer in hand	Paired consultation role play on Form A; each learner performs a patch test on a partner's inner elbow (for the record, not for today's tint)	Manual Ch. 5 to 6, Figures 7 and 8, Forms A and G, tints and developer	Completed Form A checked; patch test observed and recorded
11:00	—	Break (15 minutes)				
11:15	LO5, LO6, LO7	Kit, COSHH and hygiene; preparing the client; protecting the eyes; tutor demonstration of a full lash tint on a learner model, commentary on pad placement, application, development and removal; tint in the eye drill with saline	Live demonstration with commentary; the irrigation drill practised on a mannequin head	Observing; questions at each stage; practising the irrigation drill	Manual Ch. 8, 9, 11, 12, 16, Figures 11 and 13, trolleys, saline, mannequin head	Learners describe back the sequence before practice
12:00	LO6, LO7	Supervised practice: learners tint each other's lashes in pairs (both patch tested), the tutor at the couch for every pad placement and removal	Circulating; correcting pad placement, application and removal; timing checked	Tinting a partner's lashes; being the client and giving feedback on comfort	Workstations, tints, developer, pads, barrier, saline, timers, Forms A and C	Formative observation against L04 criteria 7 to 12; feedback at the couch
12:45	—	Lunch (30 minutes)				
13:15	LO8, LO9	Brow design: mapping and the five shapes; tutor demonstration of a brow tint and a brow wax, tweeze and trim on a model: temperature test, one spatula per dip, with the growth on and against it off, skin taut, no wax on the lid	Demonstration with commentary; every learner maps the model's brows before the tutor shapes them	Mapping and marking; observing; questions	Manual Ch. 7, 13, 14, Figures 9, 10 and 12, heaters, waxes, tweezers, scissors, pencils	Each learner's mapping checked against the tutor's
14:00	LO3, LO6, LO8, LO9	Supervised practice on the model: consultation and patch-test check, mapping agreed in the mirror, brow tint checked at one minute, then wax, tweeze and trim	Circulating; temperature tests witnessed; correcting application direction, removal angle and skin support	Full brow tint and shape on the model; records on Forms A and C	Workstations, models, tints, heaters, waxes, tools, Forms A and C	Formative observation against L04; feedback at the couch

14:45	—	Break (15 minutes)				
15:00	LO7, LO10	Supervised practice on the model: lash tint where the model's patch test allows; aftercare teach-back in pairs; contra-actions and troubleshooting from the tables	Supervising every development; teach-back checked; discussion	Lash tint on the model; aftercare in 60 seconds; troubleshooting cases	Manual Ch. 12, 15, 16, 17, models, saline, aftercare handout	Formative observation; teach-back checked by partner and tutor
16:00	LO1 to LO10	Assessments: theory paper (60 minutes, in a quiet area, adjustments as agreed); practical observations completed where not already evidenced	Invigilating; observing; marking against L03 and L04	Theory paper; practical observation completed	L02, L03, L04	Summative: L02 marked, L04 completed and signed
17:00	LO10	Results and expectations; legislation, insurance and advertising recap; the case-study requirement and deadline; questions, feedback, evaluation forms; what happens next	Discussion; questions	Completing the evaluation form; questions	Manual Ch. 10, 15, 18, 19, evaluation and reflective practice forms	Oral questioning on insurer patch-test rules and the age limit
17:30	—	Close				

Post-course (approximately 6 hours)

Three complete services on three different clients or models covering, between them, a lash tint, a brow tint and a brow shape, each with consultation (Form A), patch-test record (Form G), treatment record (Form C), before and after photographs where separate consent is held (Form B), aftercare and reflection, logged on Form D and submitted within eight weeks of the taught day. The tutor reviews each case study and records Satisfactory or Further evidence required; support by phone, message or email throughout. The CPD certificate is issued when the theory paper, the practical observation and all three case studies are satisfactory.

Evaluation and review

Learners complete the evaluation form at the end of the day and the reflective practice form with their case studies. The tutor reviews the lesson plan after each cohort and at the annual document review, and whenever a product, a patch-test rule, a legal requirement or an assessor comment changes.
